

FENTANYL

GET THE FACTS

- » 98% of the most common pills purchased from dealers are **FAKE** and contain fentanyl.
- » If you don't get your pills from a pharmacy, assume they are fake and likely **DEADLY**.
- » It only takes 2mg of fentanyl to be **LETHAL** – that's equivalent to a few grains of sand.
- » Drug dealers target teens through **SOCIAL MEDIA** and money transfer apps.
- » **24 PLACER COUNTY RESIDENTS** died from fentanyl poisoning in 2020 – nearly half of whom were under 25 years of age.
- » Fentanyl-related deaths in the U.S. amongst 13- to 24-year-olds have **INCREASED BY 491%** in the last 5 years.
- » Fentanyl is the **#1 CAUSE OF DEATH** amongst 18- to 45-year-olds in the U.S.

THERE IS NO SAFE WAY TO EXPERIMENT WITH PILLS.

Dealers are purchasing pill presses online to make fentanyl look like prescription pills such as Oxycodone, Percocet and Xanax.

Oxycodone from a pharmacy

REAL vs. FAKE

Oxycodone made with fentanyl

*If you are experiencing pain, stress or anxiety, **DO NOT** experiment with street pills. For help coping, call 2-1-1 or contact a medical professional.*

SIGNS OF FENTANYL POISONING:
